

LIMOS4...

Here are the ride status notifications and the descriptions of the actions performed by the drivers:

Ride status name

Action indicated by the status

1. Driver confirmed job details

The driver, who has been assigned a Limos4 job, timely receives an SMS with a link to follow in order to acquire the Job ID and all relevant job details. Upon receipt, the driver needs to:

- Confirm the successful receipt of job details;
- Confirm the receipt of the modifications and check if the initial reservation is properly updated;
- Confirm the vehicle is disinfected and cleaned;
- Confirm the driver is code-dressed and well-groomed.

2. Driver on the way

The assigned driver confirms he/she is on the way to pickup location

3. Driver on location

The assigned driver confirms he/she is on the pickup location

4. Passenger on board

The assigned driver confirms the passenger(s) is (are) in the vehicle

5. On stop

The driver selects this ride status in case the passenger needs to stop and, later, resumes the ride. The driver would skip the "On stop" status if there are no booked stops or the passenger does not request any stops. However, when there are stop points along the route, the driver would select the "On stop" status when the passenger exits the vehicle, and select the "Passenger on board" when the passenger returns to the vehicle and the trip is resumed. The driver can use this combination as many times as there are stops.

6. Passenger dropped off

The assigned driver has dropped the passenger off and the service has been completed
